Foreword

Thank you for purchasing!

Introducing the innovative and unique lighting diffusion system by Godox – the Cine Lighting Reflector. With its precision-designed reflector, this cutting-edge system accurately guides the light source to the desired lighting positions, allowing for precise control over the scattering of light while minimizing reliance on flags or frames on the set. What's truly astonishing is the meticulously crafted aluminum coating surface, which boasts only 3% light loss and 100% color accuracy.

The reflector is available in four different sizes to accommodate various lighting requirements: 2.75" × 2.75", 5.91" × 5.91", 9.84" × 9.84", 19.69" × 19.69".

**DIFF 1(Blue color):** Hard ray of light(diffusion rate is 13.2%)
DIFF 2(Yellow color): Medium soft ray of light(diffusion rate is 52%)
DIFF 3(Green color): Soft ray of light(diffusion rate is 95%)
DIFF 4(Red color): Soft strip ray of light(diffusion rate is 94%)

The above data is provided by Godox laboratory.
