LIGHTING SOLUTIONS FOR

# Clothing Live Streaming

Having good control over the lighting is of utmost importance in clothing live streaming. Depending on the material of the clothes, we may need to use different accessories to capture its texture, and high color rendering LED lights are necessary to reproduce the true colors. To showcase the texture, shooting on a white background can be particularly effective. By continuously adjusting the light position during the shoot, the clothing can appear more three-dimensional.

## SL Series for Clothing Live Streaming

### Steps

1. Place a Godox FL-150R flexible LED light behind the curtain in a room with a window to simulate natural window light.
2. Position a Godox SL150III with an SB-FW 35×160 softbox on the right-rear of the streamer to separate her from the background, adding more dimension and depth.
3. Hang a Godox SL200III with an SB-FW Octa140 softbox in the stand-up area to light up her activity range.
4. Set up a Godox SL150III with a QR-P90 softbox above the left front, shining down on the streamer to provide frontal fill lighting for her.
5. Arrange a Godox SL150III with a QR-P120 softbox on the top of the right front, which serves as the key light to fill in the front of the streamer from the top down.
6. Put a Godox SL150III with an SB-FW 60×90 softbox under the front of the streamer to fill in the light on her legs and skirt.

### Tips

The lighting methods are for reference and the parameters of the lights may be adjusted as needed.

### Included Items

Name	Total	Reference CCT	Reference DIM
Lights	SL150III	4	5600K 60%-100%
	SL200III	1	5600K 70%-90%
	FL-150R	1	5600K 60%-90%
Accessories	SB-FW 35×160 Strip Softbox	1	
	SB-FW 140 Octagon Softbox	1	
	SB-FW 60×90 Rectangular Softbox	1	
	QR-P90 Quick Release Parabolic Softbox	1	
	QR-P120 Quick Release Parabolic Softbox	1	
	290F Light Stand	5	
Audio	VDS- M2	1	
	Total	17	

## SL 200III for Clothing Live Streaming

### Steps

1. Place an SL200III with a CS-65D Softbox slightly higher in front of the streamer as the main light to fill both her and the environment.
2. Position an SL200III with an SB-BW60×90 softbox on the ground to light up the area below the streamer's waist, ensuring even lighting and accurate exposure to showcase the texture of the clothes.
3. Put two SL200III with CS-65D Softboxes diagonally to ensure consistent exposure as the streamer moves back and forth, getting even lighting.
4. Arrange an FL150S with an FL-SF60×60 softbox behind the streamer on the right to light up the background.

### Tips

The lighting methods are for reference and the parameters of the lights may be adjusted as needed.

Accessories	CS-65D Collapsible Lantern Softbox	3	
	SB-BW 60×90 Rectangular Softbox	1	
	FL-SF 60×60 Softbox	1	
	290F Light Stand	4	
Audio	MoveLink II M2 Microphone	1	
Total	15		

LIGHTING SOLUTIONS FOR

# Cosmetics Live Streaming

In this section, we will demonstrate the common lighting setup for large-scale cosmetics live streaming. To create a bright and natural visual effect in a cosmetics live streaming room, it is essential to avoid issues such as chaotic lighting, color deviation, and inadequate highlighting of people and products. The high color rendering LED lights accurately present the true colors of products, which helps to reduce the return rate caused by color deviation.

## SL300III for Cosmetics Live Streaming

### Steps

1. Position a SL300III with a standard reflector, aim the ceiling at 45° upward, improve the overall brightness of the room by diffused reflection of the ceiling and suppress the original stray light.
2. Place an SL300III with an QR-P90 softbox with grid on the left front of the streamer to light her from top to bottom, filling lighting for her and the product.
3. Use an SL300III with an QR-P90 softbox with grid on the right front of the streamer to light her from up to down, reducing shadows on her face and improving the details of the product.
4. Arrange the SL300III with SB-BW 60x90 softbox on the left and right sides behind the streamer respectively. Adjust the brightness and angle of the lights to illuminate her hair and highlight her profile, effectively separating her from the background to create depth and emphasis on her.
5. Set up a warm-toned desk lamp on the right side of the background. On the shelf to the left of the background, place an R1 and adjust it in warm tones, creating a background ambiance and enhance the visual hierarchy of the image.

### Tips

The lighting methods are for reference and the parameters of the lights may be adjusted as needed.

Scan the QR code to watch this tutorial on YouTube.

### Included Items

Name	Quantity	Reference CCT	Reference DIM
Lights	SL300III	5	5600K 70%-90%
	R1	1	3200K 70%-80%
Accessories	SB-BW60x90 Rectangular Softbox	2	
	QR-P90 Quick Release	2	
	Parabolic Softbox		
	290F Light Stand	5	
Audio	MoveLink II M2 Microphone	1	
Total		16	

## SL60II for Cosmetics Live Streaming

### Steps

1. Place the SL60IID with CS-65D collapsible lantern softbox on both the left and right sides of the streamer to brighten up the environment and fill side lighting for her.
2. Position an LR150 in front of the streamer to fill frontal light on her and create a circular catchlight in her eyes.

### Tips

The lighting methods are for reference and the parameters of the lights may be adjusted as needed.

Scan the QR code to watch this tutorial on YouTube.

### Included Items

Name	Quantity	Reference CCT	Reference DIM
Lights	SL60IID	2	5600K 70%-90%
	LR150	1	5600K 70%-90%
Accessories	CS-65D Collapsible Lantern Softbox	2	
	290F Light Stand	3	
Audio	MoveLink mini LT	1	
Total	9		

LIGHTING SOLUTIONS FOR

# Digital Products Live Streaming

Using a softbox to diffuse light can enhance the texture of digital products, which are often made up of a variety of materials. By incorporating gels and creative background design, the resulting photos can convey a high-tech feel and showcase the product's quality.

## SL200III for Digital Products Live Streaming

### Steps

1. Position an SL200III with a QR-P90 softbox as the main light to illuminate the streamer's face and fill light for the tabletop.
2. Place the SL200III with SB-BW 60x90 softbox on both the left and right sides to fill light for the streamer's profile, ensuring even lighting on both sides of her face.
3. Place an FL150 with an FL-SF60x60 softbox behind the streamer's left side to illuminate the background and create atmosphere.

### Tips

The lighting methods are for reference and the parameters of the lights may be adjusted as needed.

### Included Items

Name	Quantity	Reference CCT	Reference DIM
Lights	SL200III	3	5600K 70%-90%
	FL-150S	1	3800K 70%-90%
Accessories	QR-P90 Quick Release	1	
	Parabolic Softbox		
	SB-BW60x90 Rectangular Softbox	2	
	FL-SF60x60 Softbox	1	
	290F Light Stand	4	
Audio	WMicS1 Kit 2 Microphone	1	
	Total	13	

## SL300III+SL200III for Digital Products Live Streaming

### Steps

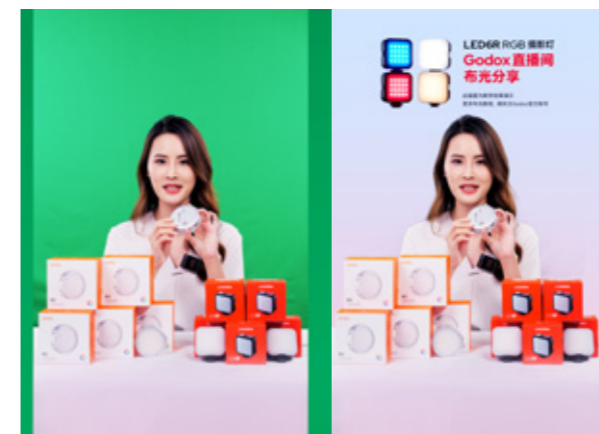

1. Prepare a 3x3 meter green background cloth to set up a green screen for the background, and use an iron to make it flat for easier image matting.
2. Place the SL300III with QR-P90 softbox on the left and right sides in front of the streamer, with a 45° angle from above to evenly light up the streamer's face and illuminate the product on the table.
3. Position the SL200III with SB-BW60×90 softbox on both the left and right sides behind the streamer to outline her silhouette and create a clean image, separating her from the green screen background and eliminating reflections from the background.
4. Utilize two SL300III with RFT-18 reflectors for an even background illumination. The RFT-18 reflector can control the direction of light projection and prevent light from spilling.

### Tips

The lighting methods are for reference and the parameters of the lights may be adjusted as needed.

Scan the QR code to watch this tutorial on YouTube.

### Included Items

Name	Quantity	Reference CCT	Reference DIM
Lights	SL300III	3	5600K 60%-90%
	SL200III	2	3800K 60%-90%
Accessories	QR-P90 Quick Release	2	
	Parabolic Softbox		
	SB-BW60×90 Rectangular Softbox	2	
	RFT-18 Background Reflector	1	
	290F Light Stand	5	
Audio	MoveLink II M2 Microphone	1	
	Total	16	

## SL150III+SL200III for Digital Products Live Streaming

### Steps

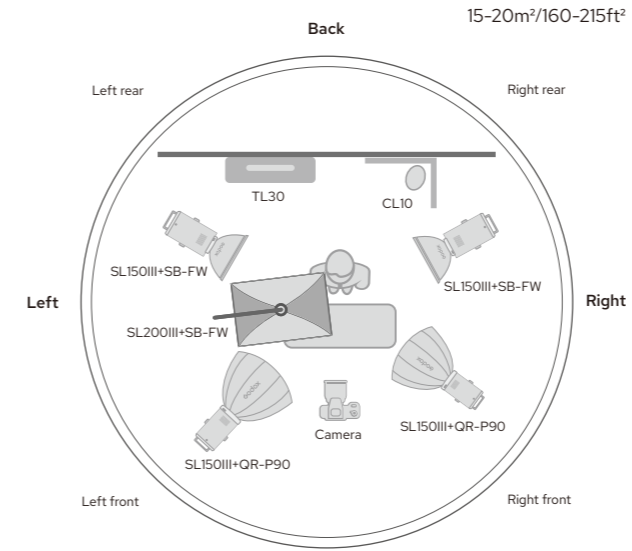

1. Use a CL10 to light up the back wall and color the right side of the picture purple.
2. Adjust the TL30 to a light blue color and use it as a background light to add depth to the image and create a digital tech mood.
3. Place the SL150III with SB-FW 35x160 softbox on both the left and right sides behind the streamer to outline him from the background, adding a sense of depth to the image.
4. Hang an SL200III with an SB-FW35x160 softbox at the top to fill light for the streamer and the products on the table.
5. Put the SL150III with QR-P90 softboxes on the right front and the left front of the streamer to fill light for him and the product on the table.

### Tips

The lighting methods are for reference and the parameters of the lights may be adjusted as needed.

Scan the QR code to watch this tutorial on YouTube.

### Included Items

Name	Quantity	Reference CCT	Reference DIM
Lights	SL150III	4	5600K 70%-90%
	SL200III	1	5600K 70%-90%
	CL10	1	RGB 70%-90%
	TL30	3	RGB 70%-90%
Accessories	QR-P90 Quick Release Parabolic Softbox	2	
	SB-FW35x160 Strip Softbox	3	
	290F Light Stand	4	
	Audio	MoveLink II M2 Microphone	1
Total	19		

LIGHTING SOLUTIONS FOR

# E-Sports Live Streaming

If you're eager to start e-sports streaming but unsure about projecting a professional image to your viewers, look no further than ES30/ES45. These devices offer portability and affordability, along with soft illumination that effectively reduces unflattering shadows on your face. They help your channel stand out amidst the sea of ordinary streams.

## ES30/45 Kit for E-sports Live Streaming

### Steps

1. Place two ES30/ES45 lights (choose based on your desired brightness) on the table in front of the streamer, on both the left and right sides.
2. Use an EM68X microphone to capture the streamer's audio.

### Tips

The lighting methods are for reference and the parameters of the lights may be adjusted as needed.

### Included Items

Name	Quantity	Reference CCT	Reference DIM
Lights	ES30/45	2	5600K 70%-90%
Audio	EM68X	1	
	Total	3	

LIGHTING SOLUTIONS FOR

# Food Live Streaming

To stimulate the appetite and create the desired atmosphere, light plays a crucial role in food shooting. The color rendering and placement of lights are of significant importance in this regard. While the quality of lights determine the color rendition, strategically positioning lights in different places can add depth and dimension to the subject, thus enhancing the food's texture and triggering viewers' taste buds. To facilitate this, Godox offers several lighting solutions to simplify the process of capturing creative food shooting.

## SL60II for Food Live Streaming

### Steps

1. Place two SL60II lights with CS-65D in front of the streamer on the left and right.
2. Put an SL60II light with an SB-BW 60x90 softbox in front of the streamer.
3. Light up the lights to provide a large area of soft light, illuminating the background and the streamer, making the entire image look more comfortable and the food more desirable.

### Tips

You can add lights according to the actual situation in the live studio.

### Included Items

Name	Quantity	Reference CCT	Reference DIM
Lights	SL60IID	3	5600K 70%-90%
Accessories	CS-65D Collapsible Lantern Softbox	2	
	SB-BW 60x90 Rectangular Softbox	1	
	290F Light Stand	3	
Audio	MoveLink II M2 Microphone	1	
	Total	10	

LIGHTING SOLUTIONS FOR

# Cookware Live Streaming

Typically, cookware has a sleek surface and a high level of reflectivity. When shooting cookware items, it is important to utilize gentle lighting with tools like softboxes or reflectors to minimize harsh shadows and achieve a diffuse glow in the picture. Godox offers a variety of lighting options for your convenience, enabling you to handle various food shooting scenarios with ease.

## SL200III for Cookware Live Streaming

### Steps

1. Place an SL200III with a QR-P90 softbox to the left-front of the streamer as the main light, illuminating her left side and half of her body.
2. Position an SL200III with an SB-BW 60×90 softbox on the left side of the streamer to fill in the shadow on her left side and also to add light to the cupboards behind her.
3. Put an SL200III with an SB-BW 60×90 softbox on the right side of the streamer to fill in the shadow on her right side and also to fill in the light on the cupboard behind her.

### Tips

The lighting methods are for reference and the parameters of the lights may be adjusted as needed.

Scan the QR code to watch this tutorial on YouTube.
